rather expensive luxury; while the high
hames, deluded by the story of the poor ulated to aggra- country boy who came to the city with a be charged. All bills due when the lum- vate the evil by constantly diminishing quarter of a dollar in his pocket, and the number of male colts born and reared to be the richest man within its far as any increase of horse flesh is conbably reached them through the columns cerned, our present practice is equivalent of some one of the innumerable speci-to spaying one half or more of all the fe-mens of sham literature, styled "family male foals that come into the world.

There is a well-defined and material dif-STRAYED from the under- male foals that come into the world. There is a well-defined and material difference between a mule and a hims, which three years old, with black mane and tail, with a small like his father, the horse, and pretty mane and tail, with a small like his father, the horse, and pretty same lottery and lost every thing, even to their very souls.

There is a well-defined and material difference between a mule and a hims, which we will briefly describe. The himsy neighbor their very souls.

There is a well-defined and material difference between a mule and a hims, which we will briefly describe. The himsy neighbor their very souls. knee, and some saddle marks on her back.
Any information concerning her will be thankfully received, and the reward paid to spend neck, the flowing mane and full tail, the the first part of the flowing mane and full tail, the flowing mane and full tail, the the flowing mane and full tail, the flowing mane to any one on delivering her to me.

ABRAHAM RIED.

Paulding, Miss., April 25, 1860. 28-3t

The main processes of the horse. In the mule, the form of the ass is more strikingly developed.

Bits to feet, and larger and wider set legs of the horse. In the mule, the form of the ass is more strikingly developed.

The processes of the horse in the mule, the form of the ass is more strikingly developed.

The processes of the horse in the mule, the form of the ass is more strikingly developed.

The processes of the horse in the mule, the form of the ass is more strikingly developed.

The processes of the horse in the mule, the form of the ass is more strikingly developed. The mule always brays like its father, and long struggle to work out the sum of life Aulf! The Public.

The publicare hereby cautioned against trading with my son THOMAS W. McGEE. He has been afflicted for five years with a disease that has impaired his mind, and rendered him incompetent to mind, and rendered him incompetent to make bargains or contracts. I will not hold myself responsible for any trades or contracts he may make, but will consider them void, and annul them as far as I can by law, and I hereby forewarn all persons.

I temper and disposition, not less than its voice, prove beyond a reasonable doubt that the blood of the ass predominates in its veins. It is, in truth, an ass much improved by an infusion of superior blood; and annul them as far as I can by law, and I hereby forewarn all persons.

Jasper County, Miss., April 6, 1860, 26-4t draught and carriage purposes. It cannot subsist on coarser fare than the horse, faces, the result of a life long acted lie. although not quite so long lived as the mule, or its own mother. The Romans mined and destroyed, and hence it is that

enough to decide for himself what he shall eat and drink, and wherewithal he shall be clothed, or, in other words, conorms to mere conventionalisms in such natters, because he dare not be thought We pride ourselves upon popular educa the consummation. It

ion and superior intellectual develop-ient. But what are the evidences—the uits by which we are to be known? The niserable superstition styled Spiritualism s more widely spread than was ever the lief in witchcraft, and New England eads off in its propagation. We hold agricultural conventions (in the cities,) ad libraries of agricultural works are established in every country town (by the patriotic efforts of men who have books sell), but our farms are run out, and our crops less than formerly. We talk nd write politics more than ever, but the ord has come to be a synonym of trickry. We have more revivals and more inning after popular preachers, but less ad more than we used to, but what is e character of the intellectual food st in demand? Turn to the column aded "Replies to Correspondents" in ny of the most popular weekly papers, oted to "Art, Literature and ettres," and judge from the tone of those pleis whether the appetites which crave ich food can be those of healthy men. whether the pabulum itself is whole ome and nourishing even for babes and ucklings. But enough of groans and idle regrets. We cannot go backwards, and the evils we have specified are the thorns which proerbially accompany every rose. Let us

own case would be if deprived of wage:

and forced to work under the whip, and we accordingly find abolitionists most rife in the places whose population is chiefly made of that class, and this and other

isms, fostered by writers who are ready to minister to popular tastes, whether healthy or morbid, are seized upon by

demagogues as the wave on which they may be borne into power.

The remedy for the evil lies in the cul-

tivation of individual independence: As long as men allow themselves to be sway-

d in masses, to form their opinions and base their actions upon the dictates of parties and sects, so long must they sub-mit to be led by demagogues and priests. And no man will ever dare rebel against uch dictates who has not moral courage

see to it that we make the rose to bloom with a luxuriance which shall destroy heir effect.—Beston Post. Comous Smirmany Nosen-The Nash ille Patriot, of Tuesday morning, has the following "story of a box": Saturday morning last a dray was driv-en to the office of Adams' Express Company, and a large dry goods box rolled out upon the pavement. The box was addressed: "Mrs. Margaret M. Thompson, The weight of the box was 265 lbs. The driver of the dray very innocently remarki-"Master, dats the curiosest box I ever saw-for every time I roll it over, the heavy side come down." The agent hought it a curious box too; but time was pressing, and he sent it down to the epot, whence it departed on the first rain, and in due time landed in Louis

ille. Here it was hastened over to Jefersonville, and hurried on to Seymour. it Seymour another change of cars was ecessary, and as the box was hastily roll-I from the Jeffersonville to the Cincin vaste in the system, is laid up in the form ati and St. Louis train, the top accidentally came off, and out popped—what? For the life of you, you couldn't guess f fat around the muscles, ready to be absorbed again into the circulation if needed. Waste is induced by exercise, or use A full grown negro man! The negro per f the muscles, and also by combustion in pired hugely-his eyes rolled up and

s, as a whole, small in quantity and de-ective in quality. We should be glad to see it improved in both respects, and re gard the propagation of hinnies as likely robable that we shall have more to say on this subject; and we invite suggestions om our readers. In this connection, we copy a paragraph om Herrent's late and valuable work,

ntitled "Hints to Horse-keepers" "It is generally asserted that the hinny as been tried and found nearly a worthss animal, though admitted to be a beauiful one. He has been tried only occasionally in Spain, since the great decline in the number and quality of the male ses, and of mules generally from the vant of mala asses, ari-ing from the frightil consumption of those animals during he Peninsular war—and the subsequen essant civil wars which have convulsed hat unhappy country, has rendered i necessary to supply their want. We are not inclined to adopt this assertion. We elieve that the hinney, so far from being worthless animal, is as good as he is handsone, and superior to the mule for the uses for which he is fitted—that is for a addle animal. But being inferior to the torse as a saddle animal, and inferior to

the mule as a beast of draught or burden, in which respect alone the latter can com-pete with the horse, he has no special place of his own; and, therefore, it havng been worth no one's while to cultivate innies, they have fallen into disuse and ot a bad name. It may, however, well be doubted whether in the great demand and inadequate supply of handsome, clevr ponies, suited to carry boys, young adies, and timid, or valetudinarian, or aged persons, who require horse exercise, it might not prove an exceedingly paying peculation to import a few of the finest and largest sized Maltese or Arabian fenale asses, (which, by the way, comman no price, as compared with the Jacks), and to breed from them to the best and ighest bred, undersized, thorough-bree tallions. We have seen abroad, in pas ears, one or two hinnies with ears but a ttle larger than those of a coarse pony with long, thin manes, full tails, sleek hining coats, which were altogether beauful animals. They have a good deal of pirit, and the patience without the stubornness of the ass." HINTS TO PORK-MAKERS.—The philoso by of increase of fat in animals is, that e digested food not needed to supply

own like one nearing the gate of the mimal heat. Hence, the some amoun reafter-but the fresh air soon revived gested, afford a greater surplus of fat than en turned up so that he was head downanimals intended for fattening, should be ard, and thus he made the trip from HINTS TO YOUNG GENTLEMEN. -- DON'T mote digestion. The quality of flesh propea vines, and the refuse of the garden shed by most kinds of stock. Cleanlines in the fattening pen should not be over-looked. Although pigs proverbially are filthy, they are not really so; they do not delight in the effluvia of their own drop pings, as any one can see by noticing that

and scrubbing with soap-suds will con duce much to their thrift-all animals In a recent article on the change of the tion in the popular character from the standard of that period. The most im sortant testimony to this effect which w
